## About This Game

Singaporeans have reported ghost sightings of Kiki, a calligrapher who had passed away several years ago. Meanwhile, Vinty receives a mysterious mail with a plane ticket to Singapore. As an aspiring calligrapher, she must learn the truth behind those Kiki appearances.

Even in death, Kiki continues to steal the spotlight. Must Vinty remain as a nobody for as long as she lives (yeah, probably)?

*"Make sure you stay hydrated honey!" - Vinty's mummy*

*"Omg, you're out with EXCELIA!?" - Vinty's sister*

---

*"Fantastic story!"* - RealReviewer23

11/10 would fly into the air again ;)

Trading cards too! + Got this from a giveaway!. Surprisingly fun for a \$15 game; It's got 6 classes, and games mostly operate as a mixture of Tower Defence, Unreal Tournament 3, and Team Fortress 2.

Singleplayer consists of just tower defending, whereas multiplayer splits 12 players into 2 teams of 6, each with a "tower" to defend, and unlimited bots. Each team can build towers or buy more bots. Sadly, hardly anyone is playing the co-op portion of the game (there was maybe 12 local servers, with half being passworded last I checked). Co-op is the same gametypes as singleplayer (tower defense with x number of waves, or unlimited waves).

Some parts of the game seem a bit unbalanced perhaps, but they don't subtract from the overall experience; my biggest complaint is that there is only about 4 multiplayer maps.. Bobs game is, as it stands a pretty neat Tetris style puzzle game with variable rules as you play. Its decent now, but hopefully it gets better and has even more variation as it gets developed.. Traversing the world of brimstone as Valerie, you explore both sides of this dystopian future. The dark, steampunky setting mixes perfectly with the goofy, humorous elements similarly to deponia. Fully voice acted, multiple ways to solve puzzles, and collectables, just a few of the things that makes this game great!

. Wouldn't bother, It's autistic.. This is a cool idea that seems well implemented. Takes a bit of getting used to constructing below floors you have already built but it looks and feels very cool to play.

. Not worth the money at the moment.

Many features missing, waste of money.

They got a long way to go.. *Margaretha Geertruida "Margreet" MacLeod (7 August 1876 – 15 October 1917), better known by the stage name Mata Hari, was a Dutch exotic dancer and courtesan who was convicted of being a spy for Germany during World War I.*

This is basically a game about how good women are at getting what they want using their charm and body. It's point and click game where you find items in environment, use said items to do various tasks, talk to people and learn their secrets, use information to your advantage, be a spy.

Some of it is also based on true events, info of which is available on wiki.

---

Excellent. I don't regret to buy it. It is exactly the game I am looking for. I am bored with those very complicated stories, 3D shooting and pixel or Minimalism style. Mechanisms are well balanced!. Edit

Seems that they put a small patch out to fix the game at higher resolution. would recommend this game :D. These coins are great, buy the bundle.. Phunny game with even phunnier characters doing phunny things. phunny as ♥♥♥♥. Does anyone play this game? I'd like to, but there never seems to be anyone online.... Does what it says.. Great, The Open World Horror Game Is something I've never seen before!!! and that's why I like it. I cannot recommend it enough! but the game has little bugs.. Can get quite intense. Also works great under Linux.

#### **Updates and Features:**

We're already scheduling an update tomorrow to fix a few small bugs.

Please use the discussion board to list bugs and add feature requests.

Thank you for your support. **Market Tycoon 1.3.0 Update (Biggest Update So Far):**

Finally, after many delays Market Tycoon 1.3.0 is here.

First, we want to apologize for the many delays of this update, we wanted to give you the best we can and couldn't just rush things and give a flawed product. We hope that you'd understand.

So let's get into it, **what's new?**

Setting aside all the background improvements, bug fixes, and optimization let's tell you about the new features.

#### **• Employee Uniform**

This feature has been asked from the beginning, and it finally made it. We remember when many of you asked for this feature, but it didn't make much sense at the time, you only had one employee option which was cashiers. There are more than cashiers now (more on that later). For this feature, you will be able to choose the style of the uniform, as well as any color you can imagine with HSV sliders which will give you a wide range of colors to choose from and easily find the color you want.

#### **• Cargo Vans and Storage**

Did this catch your attention? This is loads of fun and opens an interesting potential feature for later updates like *launching a website for your market and selling items through the internet (Planned feature)*. So what is this? After placing your item, the item will not instantly get on the shelf (More on that next). You'll have to buy a cargo van -send it to go and get your ordered items to your storage. And your items will remain in your storage until it expires or..... (see next)

#### **• Stocking Employee**

Yes, stocking employee, the game now is much more fun and realistic. So how this will work? Well, you will no longer be able to instantly place items into shelves. You'll have to hire stocking employees that will stock your items from the storage. So basically, you will place items just like you did before but the item will be semi-transparent indicating that the item isn't there yet. Once you have your item placed stocking employees will stock your items from the storage to the shelves. Now you will have to think and manage the quantity of an item you want to have. you don't want to have too much and risk losing it when it expires, and you don't want to have too little and lose potential profit you would have made while ordering -more items and stocking it.

#### **• New Markets**

This is the most noticeable thing on this update. With the introduction of the storage area which the old market didn't have, we had to make new markets. On this update, we have two markets. So, and for the lack of the storage area which is necessary to support the new -features, the old markets have been removed. Therefore, you will no longer be able to load any saved games before this update.

#### **• Other Small New Features (Graphics, Camera Movement)**

With the introduction of the new markets, we have drastically updated the graphics and the look of the game. And -to give more views of your market, now you can pan the camera up and down by moving the mouse up or down when rotating the camera.

---

We hope that you'll like how the game looks now as much as we did.

And that pretty much summarize the new features for this update, and as we said earlier there are many improvements on how things work in the background as well as loads of bugs that have been fixed many of them thanks to the bug reports we received from you over the past couple of months.

### **What's next?**

One of the features we wanted to include in this update was a brand new UI. Unfortunately, we wouldn't have been able to make it on time.

So, here is the plan for the next couple of updates\*

- **Market Tycoon 1.3.1**

Brand new UI. The whole UI of the game will be recreated to look prettier and more user-friendly.

- **Market Tycoon 1.3.2**

Steam Achievements, trading cards, and macOS support

- **Market Tycoon 1.3.3**

More content. Anything from items, shelves, fridges, freezers, etc...

- **Market Tycoon 1.3.4**

More features.

**Now we need a small favor from you.** Due to the new markets and the updated graphics we need new screenshots for Market Tycoon for both our website and the steam store page. To help us have great screenshots for the game and have a chance for your market to be featured as a screenshot on our website and the steam store page, make sure you have an internet connection and hold **Ctrl + U** to send us screenshots. Please give it a few seconds for the screenshots to be sent (time will depend on your internet speed).

If you have a good understanding in English and would like to contribute to translating Market Tycoon to other languages please contact us through -email [contact@protectiongames.com](mailto:contact@protectiongames.com)

Please don't hesitate to contact us even if Market Tycoon is already translated into your language. The more translators we have the faster and better quality of translation can be achieved for the speakers of your language.

Please note that due to the many new features added in this update, translation to your language might not be up to date yet. The translation should automatically update once it's available.

Thank you for your continued support for Market Tycoon. Have fun!

\*Subject to change

Did you notice the secret message in this announcement?

. **Upcoming update is now on beta testing!**

Hello Guys 🤪 is been a while since last update but **we've** been busy.

---

In the last 4 months, Pavlov VR development team has grown from 1 person (and part-time 3d Artist) to have 5 people working full time on the game.

This has been extremely hard for me, as before Pavlov i was just a guy freelancing to get by. And it's been a learning experience, trial and error for most of it.

And i'm really excited to show what we've been working on and i'm proud of the team for pulling this up. We hope to have some time to have a more formal introduction for the new team members, but we want to focus on the game first and most.

What's in the beta?. **Update 1.4.2.8711 - Tutorial and Hard Mode are LIVE!:**

**Hello Players,**

With Update 1.4.2, we introduce free content for both rookie miners and experienced prospectors:

- Tutorial
- Hard Mode

Tutorial. **Trading cards dropped!:**

Today, we spend trading cards to all our faithful fans! Looking forward how you like them! Play Wildlife Park 3 and get your cards!. **Albums and World Cup 2018:**

Today's update add albums to the game. This feature will show you which stickers do you have and which you need to find. You can access albums from main menu by clicking on "Albums" option. Collect them all!

Also this update contains new sticker collection - World Cup 2018, which contains 32 jersey stickers from all teams participated in this event. This pack drops from now until world cup final(14 June - 15 July).

Stay tuned for more updates that will bring out soon(and sorry for biiiiigg delay :)!.

**Slayer Shock SMILE GAME BUILDER**

**Update Information: January 23rd, 2019:**

**Updated on January 23rd, 2019**

**Update Information**

**SMILE GAME BUILDER ver1.11.4**

- - We've fixed an error: it didn't work when you select "Leader Only" in Revive Setting of Game Over Setting.

- 
- - We've fixed an error: some GPUs make the editor terrain cursor shift/blink.
  - - We've fixed an error: when you use "Escape Loop" in multiple loops, it escapes after the next first "End Loop".
  - - We've fixed an error: some GPUs make a graphic left in the preview window, even if you delete a member in the "Starting Party".
  - - We've fixed an error: "Heal by x% of Magic Attack" didn't work properly on the field maps.
  - - We've fixed an error: in the English version, the sentence when an event template was switched into an advanced event is grammatically incorrect.
  - - We've fixed an error: a sample model, B3\_Castle.fbx, is now FBX2014 Binary format.
  - - We've fixed an error: it gives you an error when you cancel the overwrite save in the 3D Character Editor.
  - - We've fixed an error: the "Monster Position" button in the event panel, "Place Battle", can be clicked even if the battle setting is the 2D battle system.
  - - We've fixed: if it fails to save the data during the saving process, you can choose to revive the last saved data.
  - - We've implemented: you can search event contents by text using "Event Search" window if you press Ctrl+F during the map editing.

### **Exporter for Unity 1.1.2**

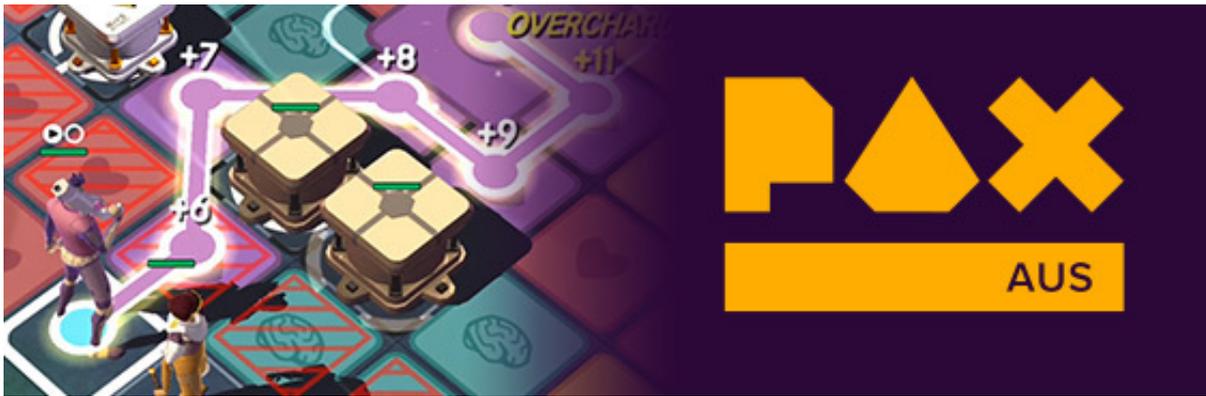

- - We've fixed an error: an import error shows up when you import exported project data using Unity2017.2.
- - We've fixed an error: an import error shows up when you import a model which contains more than 32 materials.
- - We've fixed: now you cannot export Unity project data in the game file folder.
- - We've fixed an error: if a model containing material animations is placed as an event, it doesn't animate properly.

### **. PAX Aus, IndieCade Europe and the GDWC 2017!:**

It is Melbourne International Games Week here, an awesome week of game events including the GCAP conference for game devs, and PAX Aus for everyone!

We will be showing the game at PAX Aus, so come by and say Hi if you're attending. Our booth is in the PAX Rising area. We love PAX, and look forward to meeting you there.

We will have some preview content from Episode 3 on show! And you will also be able to try an AR version of Ticket to Earth!

We will then be travelling to Paris for IndieCade Europe! We are super excited about this event. If you're attending, please come say Hi! We don't know anyone there yet, so we'd love to see a friendly face. 🤖

Finally, we wanted to share some exciting news that we just received this morning! Ticket to Earth is a finalist in the Game Development World Championship 2017! We will be going to Finland at the end of November. We're looking forward to meeting gamers and game developers there too.

# GDWC2017

GAME DEVELOPMENT WORLD CHAMPIONSHIP

Thank you for playing Ticket to Earth. We are working hard on Episode 3 and will be sharing some more info on it soon.
