Old school hack and slash action with more levels and more stuff to buy. Old school hack and slash action with more levels and more stuff to buy.Q: MediaObject.Source.ToString() is missing I am creating a windows universal app. I am using the following code: MediaObject.Source = "BitmapImageSource{bMP}" MediaObject.Source.ToString() The code is in the Load event of the page. I am getting the following error: No overload for method 'ToString' takes 1 arguments Can someone please tell me why am I getting this error and how to fix it? A: The MediaObject is created by Visual Studio and it does not have ToString overload. You can do the following: Public Function

MediaObjectToString(ByVal mediaObject As MediaObject) As String If mediaObject IsNot Nothing Then Return CType(mediaObject, MediaObject).Source.ToString() End If Return Nothing End Function You can also add it to MediaObject Public Class MediaObject Public Property Source As MediaSource End Class and then use it like this: Friday, September 26, 2009 Mumbai Police Arrests Sadhu and Woman for Rape The Mumbai Police have arrested a Sadhu and a woman for alleged rape of a 19-year-old girl in Maharashtra's Thane district. The girl told the police that she was raped on Monday by Sadhu Narendra Shivaji Patel, alias Tukaram. The Sadhu, along with his wife, was arrested by the police on Tuesday. The police said that the Sadhu 82157476af
